

Panels 1 and 4 fold and join on the opposite side of panels 2 and 3

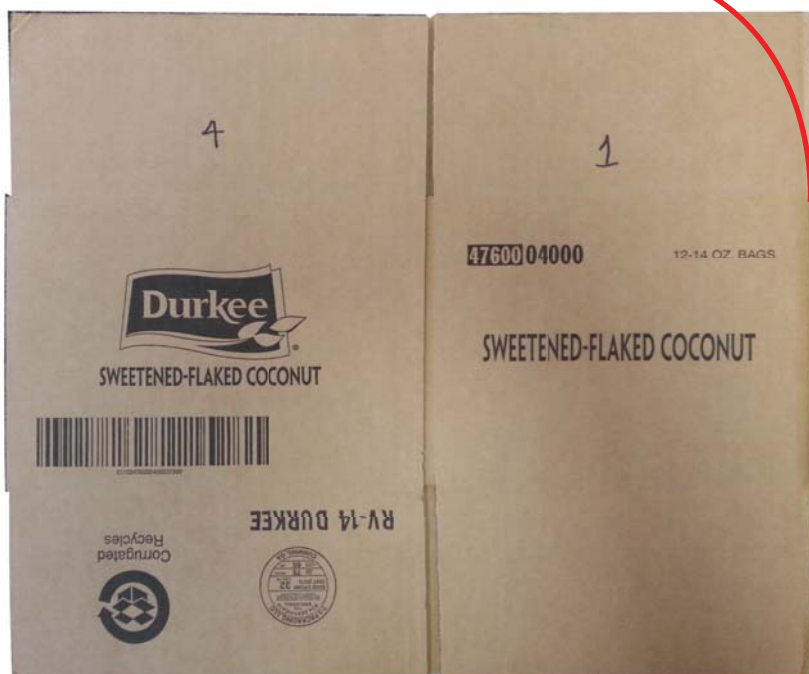

Panel 1

Panel 2

Panel 3

Panel 4

Panel 4

Panel 1

Panels 1 and 4 joined together, show the major panel leading, minor panel trailing. The layout is based on this side.

When the case is rotated by flipping the case from the right side to the left, panels 2 and 3 take the same orientation as panels 1 and 4.

Panel 2

Panel 3

Because the orientation is the same, the two sides can share the same layout/stencil, provided that the print message is the same on both sides of the case.
