Case Printing Systems

Software Application Assessment

3. If you are doing them in house, what software are you using?_____

Tech Information:

Bartender can be configured as a single stand alone application or as a network solution for multiple workstations. The network solution can be as simple as a workgroup or as complex as a Citrix environment. Applications with installations of the BarTender software on multiple workstations, require some form of a network. All network applications must have a License Server installed so that it is visible to all the workstations using the BarTender software. Applications using BarTender with Remote Desktop Services and a Citrix XenApp, will need to purchase and install the BarTender Remote Assistant to prevent the License Server from overcounting printers.

Please answer the questions that apply to your business operations.

1. Do you Have an IT department or outside service?_____
2. Will they be available for installation?_____

Stand alone

1. What operating system is installed on the PC you will be using to run BarTender?_____

Work group

A discussion need to take place to sort out the details of a workgroup. That discussion will be centered around the following questions.

1. How many PC's will be in the work group?_____
2. Are all the operating systems the same?_____
    If not, list the systems and the number of units on that system_____
3. Do you have the workgroup in place?_____Do you need help to set it up?_____

Please fill out this PDF form, save it then e-mail it back to dsievertson@iconotech.com, or fax it to 847-541-2539. If you have questions, you may call Dana Sievertson at 847-541-2494 x 102 or Val Bertelsen at 800-521-0194.
